

PowerTeacher Launcher

You will need to run the Installer once on your machine in order to open your classroom gradebook.

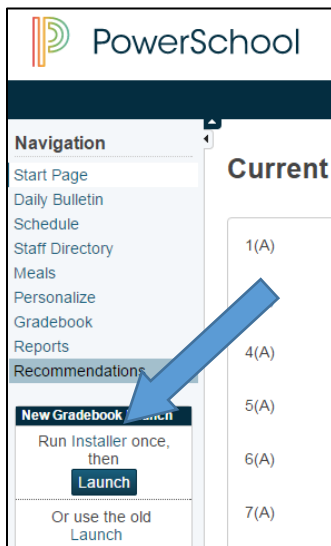

****REMINDER**** You will need to run the installer setup **ONE TIME** on **EACH** computer you use to access the Gradebook.

1. Open the M: drive and click on PowerSchool, PowerTeacher
2. Log in to PowerTeacher using your network username and password

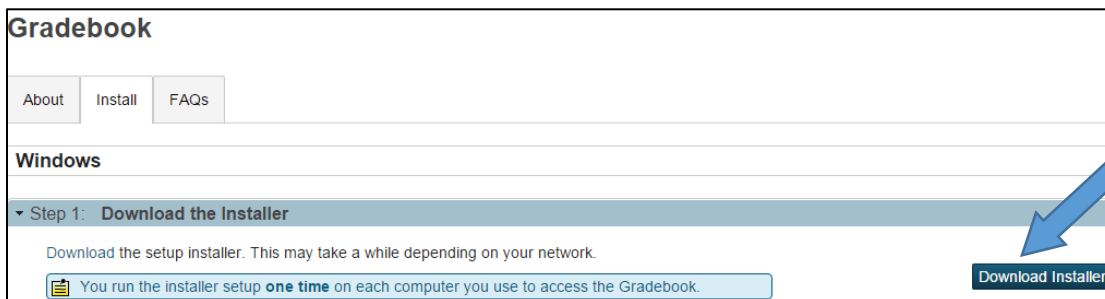

FYI: Username is case sensitive if using the desktop icon - first initial of first name, middle name and last name need to be capitalized. i.e. SKCooper

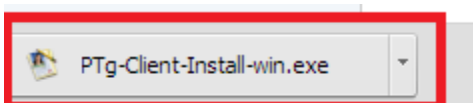

3. From here click on the **Installer** button in the left menu.

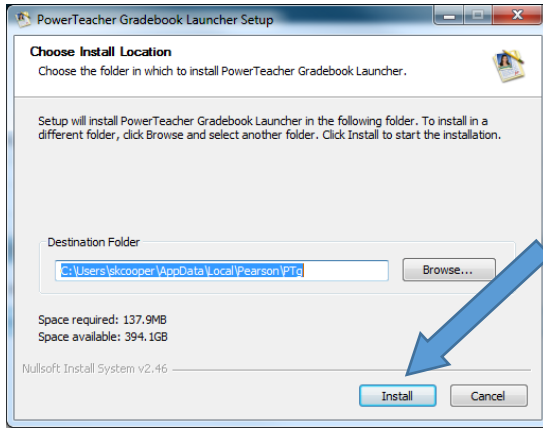

4. Click on **Download Installer**

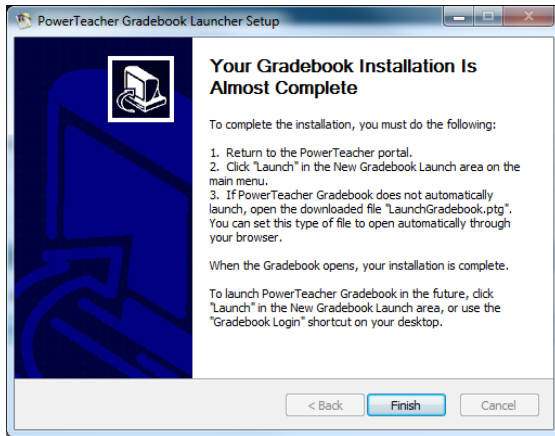

5. Once the installer file has downloaded click on the file to run it. (If you are using Chrome it will be in the bottom left corner.)

6. Select **Run** and then click **Install**.

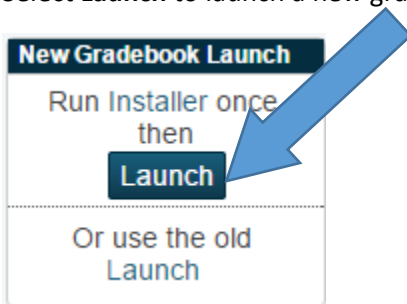

7. After the installation completes click **Next** and then **Finish**.

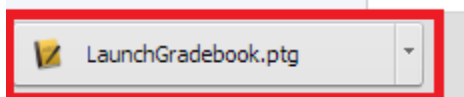

To Launch Gradebook

8. Select **Launch** to launch a new gradebook.

9. A download will occur. Click the **file** to run. (If you are using Chrome it will be in the bottom left corner.)

10. PowerTeacher Gradebook will load like normal.
