

NINITE INSTALLS BY USERS

Each user has the ability to update their browsers and plug-ins by using the Software Center

Go to Start, All Programs, Microsoft System Center, Software Center OR type “software center” in the search bar.

- If you have never installed before:
 - Click on Applications/NinitePro Monthly Updates - Install.
- If you have installed before:
 - Click on Applications/NinitePro Monthly updates - Reinstall.
 - If you don't see it on the Applications tab: click on the Installation Status tab/Ninite Pro Monthly Updates -Reinstall.

Once you start the download, do not move with your device to another location or the install may become corrupt. You will see the status change to “installed” when download is finished.

You can also check the progress of any software that has been recently pushed to your device by clicking on Installation status.
